WILMINGTON AI ACCESS & AUTOMATION PILOT
A 90-Day Roadmap for Responsible AI Adoption

MISSION

Connect one million underrepresented Americans to AI, starting with Wilmington.

Prepare residents and city systems for responsible AI adoption.

THE PROBLEM

- The U.S. ranks 24th globally in AI usage
- Residents lack devices, connectivity, and basic AI literacy
- City workflows face increasing pressure as services go digital-first
- Without access, inequality widens — healthcare, employment, and civic participation all suffer

THE SOLUTION: 90-DAY PILOT

- AI Literacy Workshops — Libraries & Community Centers
- Senior Telehealth Device Deployment
- Small Business Automation Lab
- Internal City Workflow Automation Test

Measurable. Contained. Actionable.

EXPECTED OUTCOMES

- Increased resident AI readiness and digital confidence
- Reduced administrative burden on city departments
- Measurable progress toward digital inclusion
- Scalable roadmap to expand what works

WHY DGX SECURITY

- GSA Schedule certified — government-ready procurement
- Certified small business supporting local economic growth
- Nationwide drop-shipping of laptops, hotspots, and hardware
- Mission-aligned: connecting 1 million Americans to AI
